Join over 4 million students worldwide who use Mathletics to improve their results.

- Proven to improve results fast with 24/7 access. More convenient and cost effective than a Maths Tutor.
- Consolidates learning from the classroom - based on the Australian Curriculum from Foundation to Year 12.
- Instant feedback with students able to work through the curriculum at their own pace.
- Animated support guides show students how to approach problems in a simple, visual way.
- Rewards - students earn credits and certificates for their achievements to keep them motivated and engaged, in turn building their confidence.
- Free Parent Console - receive email reports of their progress.
- Improve mental computation building speed and accuracy, through Live Mathletics. Students can challenge others from all over the world.

What happens when children use Mathletics?

The rules and concepts of mathematics build upon each other. Problem Solving, tutorials and Rainforest Maths help develop student mathematical reasoning. Mathletics supports students by allowing them to move at their own pace, over a range of topics and access structured, explicit teaching support when needed. In turn this helps to ensure basic concepts are built upon in a logical sequence. When combined with motivation and reward systems, Mathletics offers a powerful learning experience.

Achieve amazing results fast

Mathletics explains mathematical concepts in a simple and logical way. Help is just a click away. A variety of easy, medium and hard examples are shown for the students in a step by step, visual way. Even the most complex secondary equations can be explained in a simple format. Students can learn mathematics in a relaxed environment, without classroom distractions, further improving their retention.

“96% of parents said Mathletics had improved their child's understanding of mathematical concepts.”
