

Cranbourne West Primary School

SUNSMART POLICY

RATIONALE

The purpose of this policy is to encourage behaviours at Cranbourne West Primary School to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

SCOPE

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

IMPLEMENTATION

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the [SunSmart widget](#) on the school's website, the free [SunSmart app](#), or at sunsmart.com.au or bom.gov.au.

Cranbourne West Primary School has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

Shade

Cranbourne West Primary School will provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

- where students congregate
- popular play areas

A shade audit is conducted regularly to determine the current availability and quality of shade.

When building works or grounds maintenance is conducted at Cranbourne West Primary School that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Students are encouraged to use available areas of shade when outside.

Sun protective uniform/clothing

Cranbourne West Primary School's school uniform and dress code includes sun-protective clothing, including:

- loose, cool, closely-woven fabric
- shirts with a collar and/or high necklines
- longer style shorts and skirts

Throughout first and fourth terms, all students **must** wear a sun protective hat that shades the face, neck and ears for all outdoor activities. Hats may also be worn for all outdoor activities outside of these time periods, by parent or student choice.

Staff are encouraged to wear hat styles that protect the face, neck and ears when outdoors, for example broad-brimmed, legionnaire or bucket.

Students are required to wear a school hat or another hat style that protects the face, neck and ears when outdoors, for example broad-brimmed, legionnaire or bucket. Students who are not wearing appropriate protective clothing or a hat may be asked to play in the shade or in a suitable area protected from the sun.

Sunscreen

Cranbourne West Primary School encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied twenty minutes before going outdoors and reapplied every two hours or according to manufacturer's instructions.

At Cranbourne West Primary School students are welcome to attend the first aid room and/or classrooms to access sunscreen. Staff and students who may suffer from allergic reactions from certain types of sunscreen are encouraged to contact the First Aid Officer to implement a management plan to reduce the risk of an allergic reaction at school.

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside.

Curriculum

Students at our school are encouraged to make healthy choices, and are supported to understand the benefits and risks of sun exposure ie Teachers implementation of the PDHPE curriculum specifically the 'Contributing to Healthy and Actives Communities' Section.

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

Engaging students, staff and families

SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school website/intranet, staff and parent meetings, school assemblies, student and teacher activities and at student enrolment/new staff orientation.

FURTHER INFORMATION AND RESOURCES

- This policy is available on our school's website and the Sentral Parent's page
- A hard copy may also be requested from the school office
- Staff are reminded annually of the policy contents

EVALUATION

This policy will be reviewed on a cyclic basis
